Richard,

## Some comments:

- I would like to be able to hand this presentation off to CRWA as they go on their road show to other areas. The local bit about the nematodes is pretty cool, and I think we should keep it in for now, but the rest should be very portable and easy for other presenters to use.
- We have an hour and thus should shoot for about 15-20 slides. Gives us 3 minutes per slide and time for questions.
- Several slides can be consolidated: I took the lead on the 90<sup>th</sup> percentile calculation slide.
- I don't think it is worth the time to go over Flint. There are other more local concerns that can be raised.
- I have made a few comments directly within the PPT and deleted what I viewed as unnecessary slides.
- I would like about 5-6 slides to go over critical LCR points of compliance.
- Monitoring periods 0
- Common sampling problems 0
- Required monitoring after an ALE 0
- **Public Education** 0
- **Corrosion Control Treatment Steps**

These were fast edits and were intended to be constructive. I am not offended if you wish to disregard.

Happy Thanksgiving!

-Luis
